# Contents

<b>Preface</b>	9
<b>1</b>	<i>Guppy Species Basics</i> . . . . . 13
	Secondary Sex Characteristics . . . . . 15
<b>2</b>	<i>Guppy Color System</i> . . . . . 17
	Three Classes of Color Cells . . . . . 17
	Color Cell Types . . . . . 18
	Melanophores. . . . . 19
	Red and Yellow Color Cells . . . . . 19
	Iridophores and leucophores . . . . . 19
	Color Cells are Layered. . . . . 21
	Bagnara Introduces the Third Dimension. . . . . 22
	Color Cells Result From Biological Pathways . . . . . 27
	Color Cell Development and Differentiation . . . . . 33
	The Reticulation Pattern . . . . . 36
	Other Factors . . . . . 39
	Recap . . . . . 40
<b>3</b>	<i>The Study of Genes</i> . . . . . 41
	Why Study Guppy Genetics? . . . . . 41
	Nothing is known about guppy genetics. . . . . 41
	Guppy genetics does not conform to genetic laws. . . . . 43
	Guppy genetics is esoteric. . . . . 44
	“I have never known a guppy geneticist that has raised a decent guppy.” . . . 45

I am a sight breeder, not a geneticist. . . . .	46
Guppy genetics does matter! . . . . .	47
What is Genetics? . . . . .	48
What is a Gene? . . . . .	48
Mendel's Discovery of Genes . . . . .	49
The Physical Structure of the Gene . . . . .	52
Dominant and Recessive Genes . . . . .	55
Co-Dominance and Partial Dominance. . . . .	58
Heterozygous and Homozygous. . . . .	58
Mutation. . . . .	58
Alleles . . . . .	59
Linkage . . . . .	61
Shuffling the Deck . . . . .	63
The Punnett Square . . . . .	65
Variation and Biological Pathways . . . . .	69
Discontinuous Variation . . . . .	69
Biological Pathways . . . . .	70
Continuous Variation . . . . .	73
Environmental Influence. . . . .	74
Developmental Noise . . . . .	75
Summary . . . . .	75
Law of Segregation . . . . .	75
Law of Dominance. . . . .	76
Law of Independent Assortment . . . . .	76
Mendelian Trait . . . . .	76
Genes and Chromosomes. . . . .	77
Autosomal and Sex-Linked . . . . .	77
Homozygous and Heterozygous. . . . .	77
Genotype and Phenotype . . . . .	77

	Parental (P) and Filial (F1, F2) Generations . . . . .	78
<hr/>		
<b>4</b>	<i>Mutations</i> . . . . .	79
	Frequency of Mutations . . . . .	79
	New Genes . . . . .	81
	Chromosomal Mutations . . . . .	81
	Mutations During Development . . . . .	83
	Mutations Affecting Biochemical Synthesis of Pigments . . . . .	83
	Pseudogenes . . . . .	89
	Summary . . . . .	89
<hr/>		
<b>5</b>	<i>Guppy XY Sex System</i> . . . . .	91
	The Sex Chromosomes . . . . .	91
	The Sex Determining Region (SDR) . . . . .	92
	Sex-Linked Inheritance of Traits . . . . .	95
<hr/>		
<b>6</b>	<i>Breaking the Link: Crossover</i> . . . . .	99
	Crossover Frequency . . . . .	101
	Crossover and the SDR . . . . .	103
	Observing Crossover . . . . .	104
	Using Crossover as a Breeding Tool . . . . .	104
<hr/>		
<b>7</b>	<i>Gene Expression</i> . . . . .	107
	Regulatory Genes . . . . .	109
	Guppy Genome . . . . .	111
	Genotype and Phenotype . . . . .	112
	The Gene Orchestra . . . . .	115
	Summary . . . . .	116
<hr/>		
<b>8</b>	<i>Genetic Analysis</i> . . . . .	117
	A Simple Mendelian Cross . . . . .	117

The Punnett Square . . . . .	119
F1 Generation of the Cross . . . . .	119
F2 Generation of the Cross . . . . .	121
Extended Example: Determining if a Gene is Autosomal Dominant . . . . .	122
Probability of Multiple Traits . . . . .	127
F1 Generation. . . . .	129
Backcross. . . . .	130
Using Branch Diagrams to Predict Progeny Ratios. . . . .	131
Summary . . . . .	133
<hr/>	
<b>9</b> <i>Breeding the Show Guppy</i> . . . . .	135
Defining the Terms . . . . .	135
Start with the Best Genes . . . . .	136
Shaping the Strain, Herding Wild Cats . . . . .	137
Divide and Conquer . . . . .	138
Get Intimate With Your Strain . . . . .	138
Choosing the Breeding Method . . . . .	139
Inbreeding . . . . .	139
Inbreeding as a Tool . . . . .	140
Selective Breeding . . . . .	142
Studies of Selective Inbreeding . . . . .	142
Outcrossing Inbred Guppies. . . . .	143
Crossing to Wild Guppies for Hybrid Vigor . . . . .	145
Linebreeding . . . . .	146
To Outcross or Not To Outcross... . . . .	149
Reciprocal Cross . . . . .	151
Backcrossing . . . . .	151
Test Cross. . . . .	151
Selection Criteria for Show Guppies . . . . .	152

	Selecting for Body Size . . . . .	152
	Use Colony Breeding . . . . .	153
	Fin Shape Determines Selection Criteria . . . . .	153
	Fin and Body Color and Pattern . . . . .	154
	Summary . . . . .	155
<hr/>		
<b>10</b>	<i>Common Breeding Strategies</i>	157
	Developing a New Strain . . . . .	157
	Transferring Autosomal Traits to a New Strain . . . . .	163
	Can a Heterozygous Phenotype Be Purebred (Fixed)? . . . . .	165
	Fixing a Homozygous Strain . . . . .	166
	Recovering the Female . . . . .	167
	Basic Strategy . . . . .	168
	Making a Strain Breed True (Homozygous) . . . . .	169
	Summary . . . . .	170
<hr/>		
<b>11</b>	<i>Common Mutations</i>	173
	Albino (RREA and WREA) . . . . .	173
	Asian Blau Mutation . . . . .	174
	Blond and Golden . . . . .	175
	C . . . . .	176
	Coral Red . . . . .	176
	Elongated Dorsal (Hi-Fin) . . . . .	177
	Emerald Green Iridescent . . . . .	177
	Fantail Fin Shape . . . . .	178
	Flavus . . . . .	179
	Full Red . . . . .	179
	Grass Guppies . . . . .	180
	Half-Black or Ni (Nigrocaudatus or Nil and Nil) or Tuxedo . . . . .	181
	Magenta . . . . .	182

Merah Fin Shape . . . . .	182
Moscow . . . . .	183
Pigmentierte caudal finis (Cp) . . . . .	184
Pink and Pingu . . . . .	186
Pink White . . . . .	187
Pintail Fin Shape . . . . .	188
Ribbon (Giessen) Fin Shape . . . . .	189
Roundtail Fin Shape . . . . .	190
Saddleback / Half-Tuxedo . . . . .	191
Snakeskin . . . . .	192
Spadetail (Coffertail) Fin Shape . . . . .	193
Speartail Fin Shape . . . . .	194
Stoerzbach Metal . . . . .	195
Swallow/ Berlin Fin Shape . . . . .	195
Swordtail Fin Shape . . . . .	197
<hr/>	
<b>A</b> <i>Appendix: Gene Table</i>	199
<hr/>	
<b>B</b> <i>Guppy Dictionary</i>	201
<hr/>
